BLACK 146995
WHITE 146996
SILVER 146997

Shortening Chain Links

Click!

Squeeze

Determine required length. Roll Chain Links over itself and squeeze together. Chain links will separate.

Easy-Desk-2B & Easy-Floor Installation

Underside view of Desk

Choose the location of the Easy-Desk-2B on the underside of the Desk. Please take note where the cables are located on the desk and where the connection is originating from.

Fix the Easy-Desk-2B with the 2 x screws provided. Once secure, insert the Pins of the Cable Snake Chain Link into the Easy-Desk-2B. Force may be required to engage the Pins into the bracket. Apply the same technique to assemble the Easy-Floor.

Optional Magnet installation with E-Mag-2B

Assemble the E-Mag-2B onto the 2 x Pins of the Cable Snake Chain Link.

Locate a horizontal metal section of the desk frame where the magnet can be attached. To test the strength of the attachment, pull the assembly straight down. If the attachment of the magnet is not secure, test another location along the metal frame and repeat the test.
