

The Eagle floor box offers a unique combination of features: speed of installation, strength, versatility, aesthetics and a configurability unlike anything that has been seen before within a floor-box system.

The EAGLE floor box is OE Elsafe's largest capacity floor box with a sleek and stylish stainless-steel lid that allows for services to be provided directly to workstations, conference and training rooms where other access is not available or practical.

The high quality stainless steel lid is equipped with a soft close mechanism and is available in either a solid lid finish that accentuates the quality of the lid or a discreet recessed lid finish that will allow carpet, carpet tiles or similar floor finishes to be installed to discretely merge in with its surroundings.

The Eagle has been designed to fit directly into a carpeted raised floor or when used in conjunction with the Eagle Screed box, the Eagle can be installed into a concrete floor. The Eagle box has also been designed to fit into an existing OE Elsafe Condor Screed box if retro-fitting is required.

The EAGLE design also allows room for cables to be stored within the box when not in use.

U.P.S.

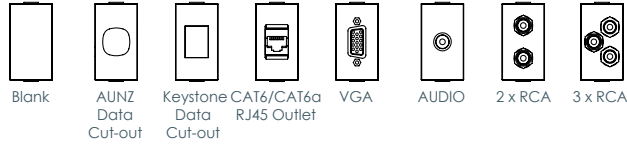

- Soft close lid
- Solid lid or recessed lid
- Large capacity
- Easy reconfigurability
- Compatible with OE Elsafe's Qikfit series
- Can be retrofitted into a Condor screed-box
- Suitable for raised floors or concrete floors

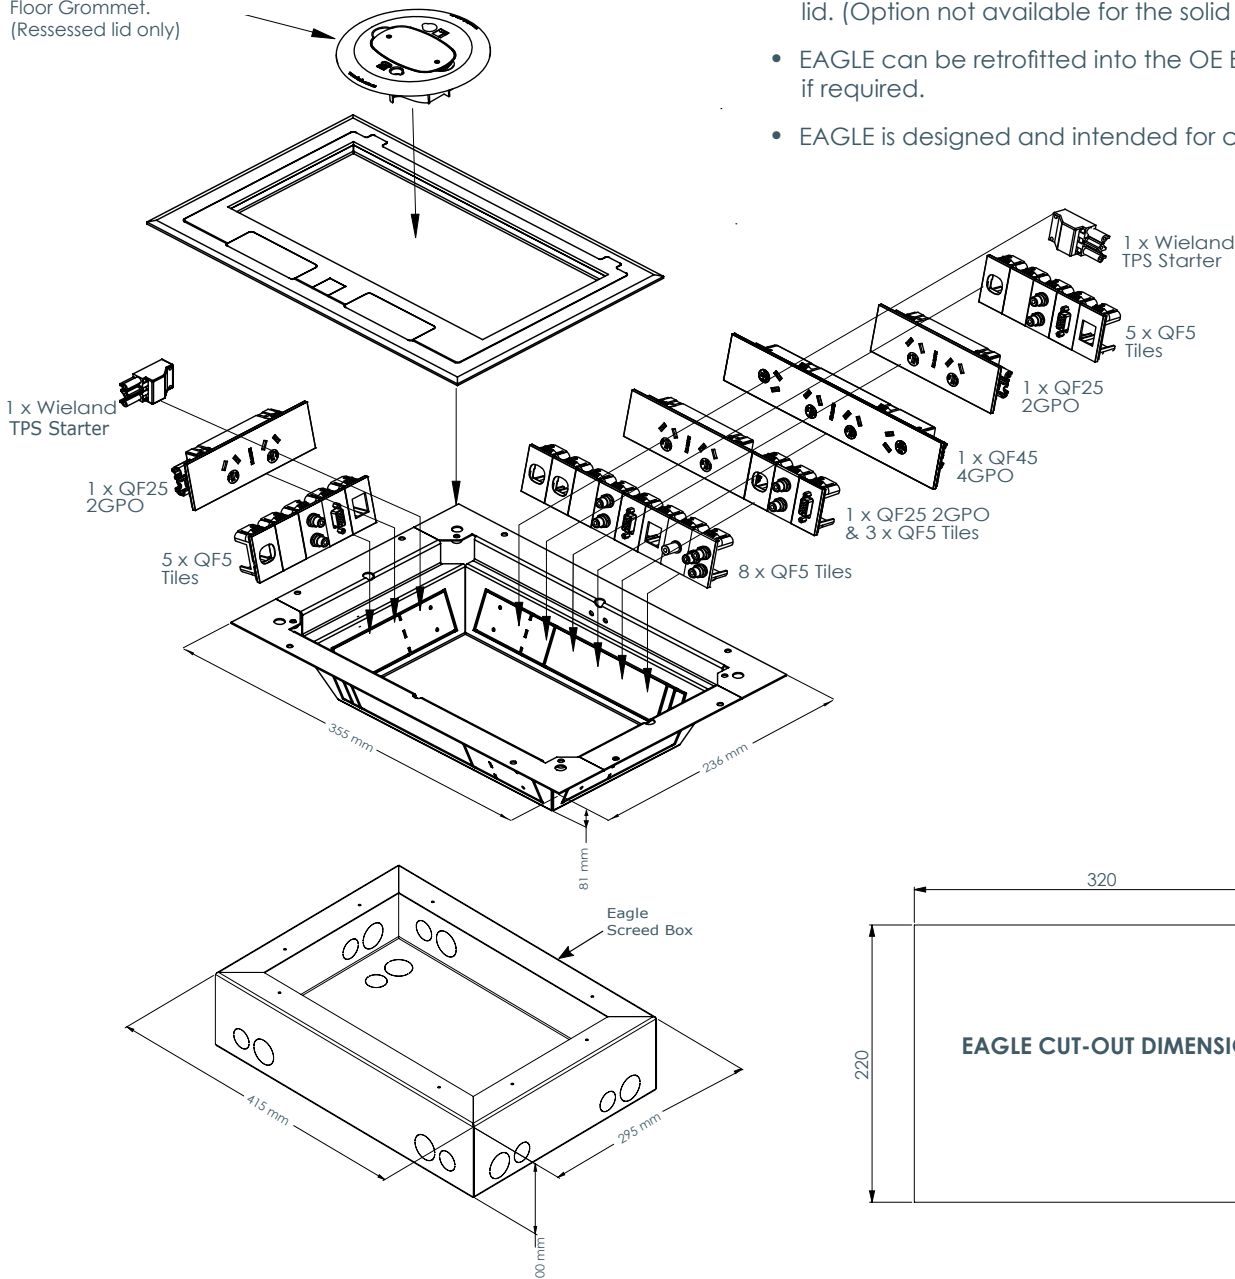

Common Components

QF5 Tiles to provide Data and AV solutions *see website for more options

Removable lid can accommodate standard OE Elsafe MESSENGER Floor Grommet. (Recessed lid only)

Features

- Large capacity to house cables when not in use.
- Soft Close action of the lid. NB: Soft close is designed to work with carpet with a thickness of up to 12mm, for installation with thicker carpet please contact OE Elsafe for further advise.
- The 4 inside walls of the EAGLE are designed to accept many options including 20A starters, 2 or 4 GPO's and a range of Data and AV fittings in QF5 Tiles.
- The GPO's can be hardwired or soft wired to provide design flexibility.
- The EAGLE floor-box has been designed to be reusable, relocatable and can be easily retrofitted with OE Elsafe's many POWER, DATA, AV options.
- As an optional extra: for high volumes of cable that require distribution in a controlled method a MESSENGER Floor Grommet can be inserted into the EAGLE recessed lid. (Option not available for the solid lid version)
- EAGLE can be retrofitted into the OE Elsafe CONDOR box if required.
- EAGLE is designed and intended for commercial use.
