

Four, Six and Eight Parramatta Square

The transformation of Parramatta Square will inject 290,000 sqm of premium grade commercial office space over six new state-of-the-art towers. OE Elsafe is pleased to have partnered with AWM (Australian Workstation Manufacturer) to provide above and below surface power as well as cable management solutions for the project.

Four Parramatta Square was the first tower to be finished, complete with level after level of premium office space designed to facilitate agile working as specified by the anchor tenant Property NSW.

AWM supplied commercial furniture including 6000 Alto Electric Sit-2-Stand workstations, many fitted with QikSILVA desktop power rails. QikSILVA power rails provide above surface power and USB fast charging with additional below surface power provided by QikFIT clip in power modules. PATHFINDER umbilicals guide and protect cables completing the soft wiring solution.

PRODUCTS

- QikSILVA Desktop Power Rails
- PATHFINDER Umbilical Cable Management
- QikFIT Underdesk Power Modules

Four, Six and Eight Parramatta Square

PRODUCTS

- PixelTUF Desktop Power Modules
- Pathfinder Umbilical Cable Management
- QikFIT Underdesk Power Modules
- PRODIGY Underdesk Cable Baskets

The interconnected towers of Six and Eight Parramatta Square were completed in mid 2022. AWM supplied workstations to levels 1-15, fitting many with OE PixelTUF desktop power and USB fast charging modules. Additional below surface power is provided with QikFIT clip in power modules. A combination of PRODIGY cable baskets and PATHFINDER umbilicals complete the below surface cable management solution.

OE Elsafe supplied just over 18kms of IC cables for the Parramatta Square Project - enough to go over the Sydney Harbour Bridge 16 times!

Every OE Elsafe project delivers the best in end user power and charging options. Completing the installation is a combination of soft wiring componentry including cables, starters, connectors and cable management solutions. Below are some of the soft wiring components supplied;

- 8728 GST/DIST connectors
- 18496 metres of IC Cable
- 1217 wall Starters
- 757 metres of PRODIGY Cable Baskets
- 308 metres of Pathfinder Cable Umbilicals

OE supplied enough Pathfinder to almost reach the top of the Q1!

QikSILVA above surface power rail has been designed with a minimalist approach in mind. Compact and sleek, it is the designer's choice. QikSILVA can be ordered with OE Elsafe QikFIT power data /AV and USB charging modules.

QikSILVA is fitted using a standard or quick release bracket. The Quick release bracket can be fitted from above the desk making it ideal for hot-desking and training tables where quick relocation is required.

PixelTUF in surface power module presents both mains and mobile phone USB fast charging in an ultra-compact power module.

PixelTUF comes standard with TUF PD (power delivery) USB fast charging or alternatively can be ordered with TUF HP (high powered) USB C laptop charging.

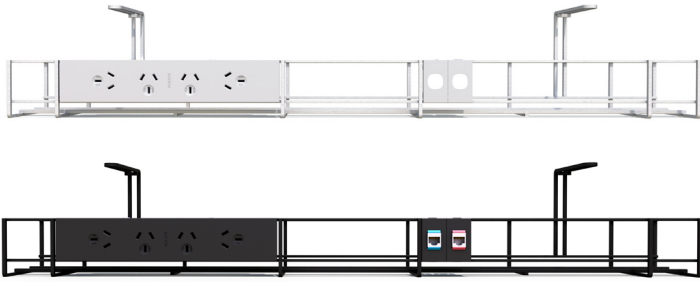

PixelTUF fits a standard Ø80mm grommet cut out, secured in place with a hand tightened fixing collar.

product profile

PRODIGY cable baskets are designed for speed of installation and configurability.

PRODIGY comes with built in mounting arms making PRODIGY the fastest cable baskets to install on the market today.

OE QikFIT Power, Data and AV components simply 'click' directly into the face or back of the basket completing the solution in the fastest time possible.

PATHFINDER provides a complete vertical cable management solution.

PATHFINDER features a wide range of floor, desk and ceiling fixing options for complete flexibility in installation.

Pathfinder has been designed with internal segregation for power and data cables.

Combine PATHFINDER with PRODIGY cable baskets for a complete cable management solution.
