#### **Compact and Elegant**

Completely enclosed sections provide improved aesthetic over 'open segment' umbilicals

#### Segregated Sections

The unique design of the OE Elsafe Messenger incorporates two fully segregated compartments ensuring that data and power cabling are kept separate.

#### Cross section – Two compartment 1000mm2 per compartment

#### Quick release button

A unique quick disconnect latch mechanism, that cannot be accidentally operated.

#### **Press in Cover Plugs**

4 press in screw cover plugs (2 plus 2 spares) are provided on the rear of the umbilical closure cap to complete a clean and crisp finish in the floor

#### **Cable protection**

Central stainless steel cord guarantees protection of cables from undue pressure or tension

#### Ease of use

The interlocking jaws of each segment allow cables to be 'wiped-in' or removed easily at any time without the need to disassemble the umbilical

#### **Messenger Grommet**

For installation (80mm hole) in raised floors or floorbox lids the grommet provides a simple means of cable routing/protection through the floor.

The unique locking bridge allows the instant locking/unlocking of umbilicals to/from the floor – ensuring maximum protection to cables from undue stress.

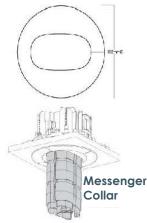

Quickly installed with 'swing out clamps' and a wide flange, to cover the cut edge of the carpet, the grommet provides a neat and secure base fixing with an overall outside dimension of 125mm diameter.

#### **UMBILICAL ACCESSORIES**

Collar (White) - a smart through surfaces trim for ceiling, desk or 19" rack cabinet applications

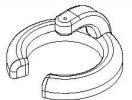

Terminations Floor Grommet (Grey) Through surface fixing

Collar installation procedure (installed into a 102mm hole, from 2 - 40mm thick)

Weighted Base (Black) Steel disc/Cast horseshoe

## STANDARD UMBILICAL CONFIGURATIONS

#### loop to pin (C17)

Ideally suited for ceiling hung umbilicals either down to desk, screen or floor. The loop attaches to a hook/eyebolt allowing the wire to be pulled tight and/ or length adjustability.

### Applications using loop to pin configurations

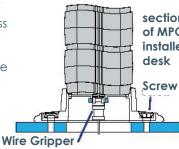

Gripper base (C15) - provides a fixed lower connection point to prevent movement of the umbilical and thereby ensure protection of the cables. Generally used in ceiling-floor or ceiling-screen applications.

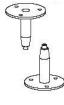

Collar base - a neat through desk solution with integral gripper allows cables to drop straight into the underdesk cable management, see illustration below far right.

MPO base (Messenger only)- ideal as a seemless link into the top of workstation screens, completely enclosing the cables all the way into the screen, see right:

Gripper (CG2) Screw down/up fixing

MPO (Grey)\* Surface mount fixing

\*Messenger Only

Pin to Pin (C21)

Predominantly for use between desk andfloor - they are not length adjustable. Stocked in 750mm lengths, however special lengths can be made to suite eg: height adjustable desking.

## Applications using pin to pin configurations

Weighted base (C14) - simple solution to 'reduce' movement at the umbilical base. NB: Weighted bases provide limited stress protection for the cables and in this respect are unsuitable for ceiling hung applications.

Grommet base (C13) - provides total protection of cables into the floor. Ideal for raised floor. applications, but also for installation directly, into floor box lids - considerably increasing the cable exit capacity of a floorbox.
