

# polarSPINE

The POLARSPINE is made from extruded aluminium forming a very strong, rigid but light vertical protection for power and data cables.

72mm in diameter with either two or three completely separate sections, the POLARSPINE provides a sturdy and stylish cable management system.

The POLARSPINE is part of the POLAR family of products and is available as a POWERPOLE fitted with power and data outlets for a total workspace solution.

POLARSPINE can be used floor to desk or floor to ceiling. Please specify height of table or ceiling when requesting a quote.

Please call or email sales for further information and technical drawings.
