COMMON COMPONENTS

*Wide range of data cutouts and couplers available.

FITTING

3-10mm **6-14mm**

Thick Panel Frame Clips allows fitting into panels 3-14mm thick.

FEATURES

Configuration:
QikFIT Thick Panel Frame can be configured with OE Elsafe QikFIT power, data and AV modules to suit the workspace.

Construction
QikFIT Thick Panel frame is moulded from fire retardant polycarbonate.

Technical
The Thick Panel Frame comprises of three parts:

- The polycarbonate frame
- Two frame clips made from Nylon 6/6 to allow them to spring as required.

The clips are able to be adjusted for variations in panels from 3 - 10mm and panels from 6 - 14mm thick.
QIKFIT power, data and AV modules are designed and intended for commercial use only.

"We test every pin in every socket in every module"
Overall Size:

38mm **300mm** **65mm**

Cut-out Size:

290mm **55mm**

## Mounting of QikFIT modules in Thick Panel Frames:

QikFIT Panel comes with three moulded posts for stability. For installation of data (up to 9 x QF5 tiles), do not remove the posts. For Power, data and AV mixed configurations, remove posts as per the guide below.

### QF5 Install
(Data & AV Tiles)

For all data / AV (up to 9), leave all posts.
QF25 Install
(QikFIT 2GPO Data/AV)

For 2GPO plus data / AV, remove 1 (left) posts.

QF35 Install
(QikFIT 2GPOTUF)

For 2GPOTUF in central mount, remove all posts

QF45 Install
(QikFIT 4GPO)

For 4GPO, remove all posts
