

The OE Elsafe Raptor is a stylish and sleek floor box solution specifically designed for open spaces with polished concrete floors.

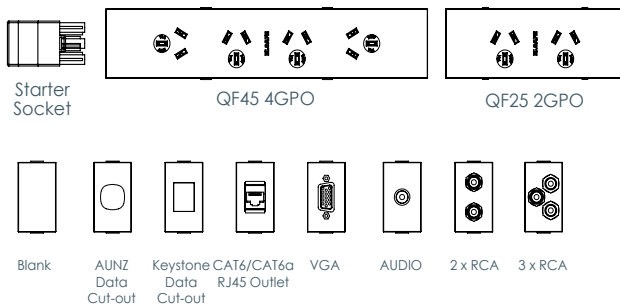

The Raptor floor box provides Power, Data and AV services directly to workstations, conference, meeting and training rooms, where other access is not practical.

The Raptor floor box comes complete with an integrated screed box and once installed the stylish stainless-steel lid sits flush with the floor for a streamlined finish.

OE Elsafe's Qikfit series of power and data modules fit perfectly into the Raptor floor box allowing flexible configurability and customisation to meet all your data and AV requirements.

COMMON COMPONENTS

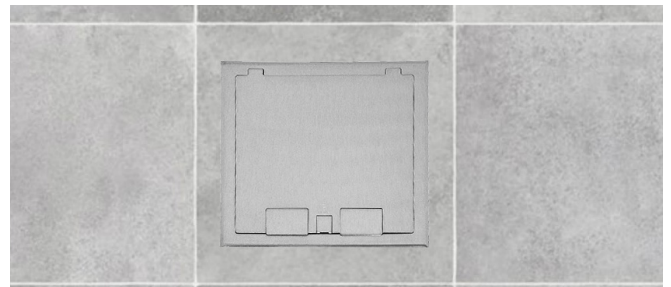

QF5 Tiles to provide Data and AV solutions

*See website for more

**Power and Data must be installed on opposite sides of the Raptor Chassis

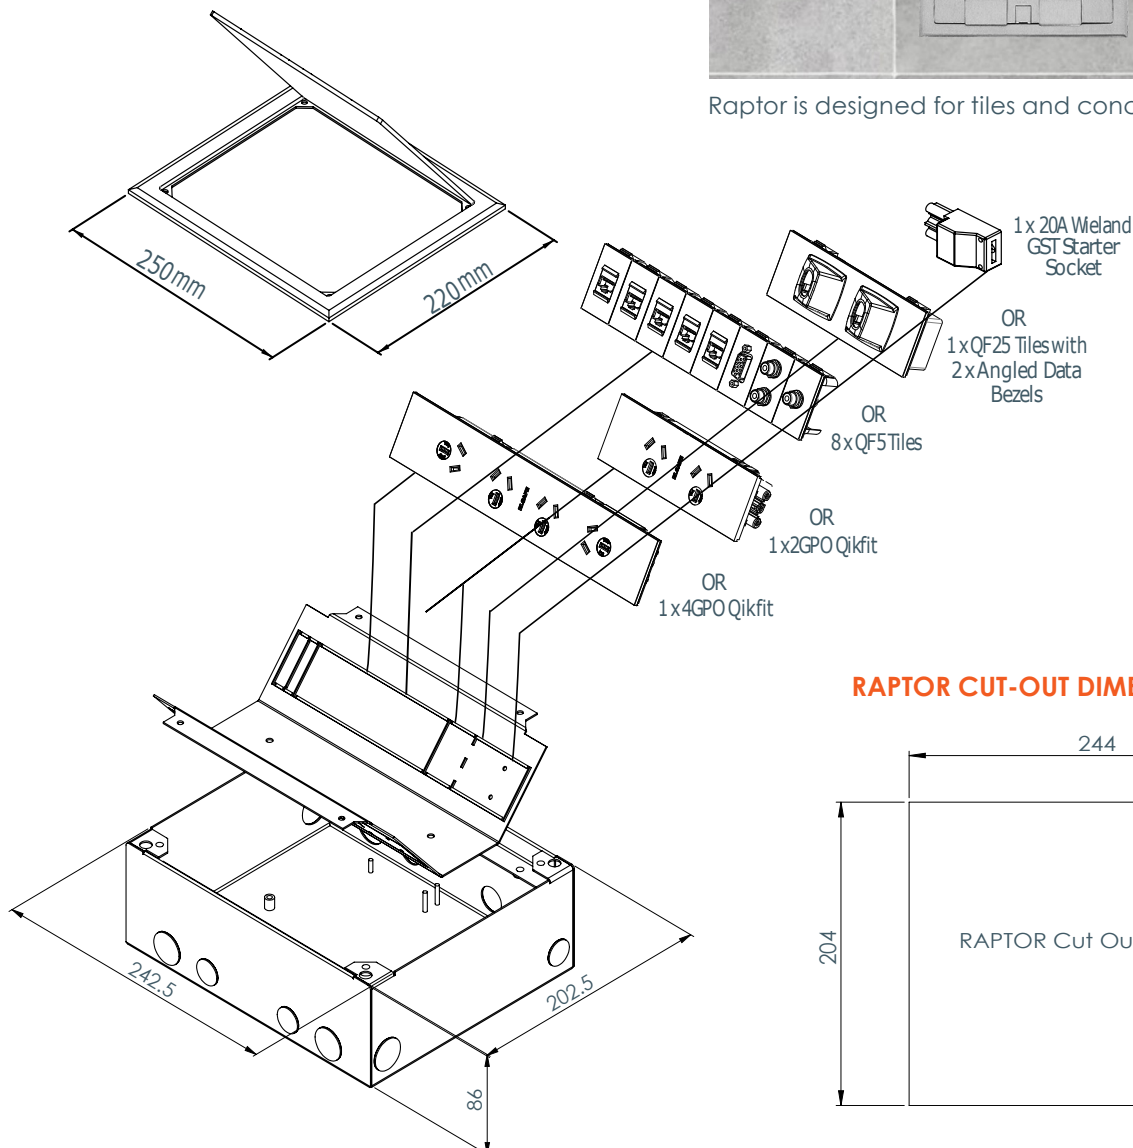

FEATURES

- Integrated screed box for easy installation before the concrete pour.
- Comes complete with a removable temporary lid which is replaced with the stainless-steel lid after the polishing process.
- The two long inside walls have been designed for various options including OE Elsafe 20A starters, 2 or 4 GPOs and a range of Data and AV fittings in QF5 tiles.**
- Unique chassis designed to allow single circuit GPOs on either side of the floorbox.
- Raptor is designed and intended for commercial use.

Raptor is designed for tiles and concrete polished floors
